SUMMARY

Data Analyst and Power BI Developer for a 100+ branch retail chain, with 8 years in retail sales and branch management before moving into data. I build the company's Power BI models and run a 32-report cycle for every department, from Odoo ERP data through Microsoft Fabric. I start from the business decision, agree the KPI with stakeholders, then build the report.

KEY ACHIEVEMENTS

Cut data sync cost by 99%

Rebuilt the daily ERP-to-Fabric sync from ~8,200 to ~50 CU-seconds per run, validated row for row across 30 tables.

Recovered 130K lost sales lines

Found a data migration gap that silently dropped sales history and reconciled it order by order.

One version of the truth

24 Power BI reports on one model, with KPI definitions agreed with management.

Exceeded branch KPIs by 20%

Led a retail branch team above its KPIs for two years as Branch Manager.

EXPERIENCE

Business Data Analyst & Power BI Developer · Knoz Elhekma 2025 – Present

- Build and maintain a hybrid Power BI model (Import + DirectQuery) serving 24 departmental reports, with DAX for last year, like-for-like, targets, returns and sales channels.
- Deliver 32 recurring reports, daily to quarterly, for supervisors, quality, marketing, inventory, HR, training and purchasing, including exception reports that flag branches below 80% of target.
- Agreed KPI definitions with management (fees excluded from net sales, online orders credited to the shipping branch) so every department reports the same numbers.
- Diagnosed throttling on a Microsoft Fabric F2 capacity and cut daily sync compute by 99% by replacing a Spark notebook with Python.
- Wrote KQL logic that measures online bundle offers the ERP never tagged; totals reconcile exactly to net online sales.
- Recovered ~130K sales lines lost in a data migration and fixed data-quality issues in audit and purchase data.

Sales Specialist · Etaret Elhekma KSA 2023 – 2025

- Analyzed customer purchasing patterns and sales trends to recommend products and identify new sales opportunities.
- Built long-term customer relationships while consistently meeting sales targets.

Sales Representative · Halwan Bros 2022 – 2023

- Prepared sales reports and tracked performance against monthly objectives.
- Generated new sales opportunities and maintained key customer accounts.

Branch Manager · Zamany Company for Oud & Incense 2017 – 2021

- Led the branch team to exceed its KPIs by 20% over two years.
- Managed daily operations, sales, inventory and customer service quality.
- Trained and coached staff to improve productivity and the customer experience.

SKILLS

Technical Power BI (DAX, Power Query, data modelling, Import/DirectQuery) · Excel (Advanced) · KQL · Microsoft Fabric (Eventhouse, notebooks) · Python (pandas) · Odoo ERP data
Business KPI design · Retail analytics (LY, like-for-like, targets, returns) · Stakeholder reporting · Data quality & reconciliation

EDUCATION

Bachelor of Health Sciences · Sohag University 2018
